   *Profile Photo   *First Name   *Last Name   *Gender   *Date of Birth   *Country   *Province   *City   *Phone number   *email

   After adding these fields send verification code to phone number, if phone number is not added before then create account successfully

3- Main Homepage should appear after login showing following things;

(You can also use idea of olx for designing homepage but these fields for all products are mandatory)

- Product Varieties   * Product Name   * Crop Year   * Product Pics *City   *Mandi if any   * Bags Qty   *Qty / Bag
- * Total Weight In KGS Available   *Price per unit   * Payment method (Advance, Cash on delivery, Credit)
- * Will seller sell the partial stock also or complete (if partial then min how much)
- Will Seller Deliver stock or buyer will collect it
- Any Extra Details
  a- Add different filters on homepage (like to see specific variety, specific city products listed, specific price range, specific Qty) you can see idea of olx also for this

4- Daily Rates
   - This input will be done by our team only user will see the data entered such as
     (Product name, variety, date, price / 40kg)

5- Next Page is of Selling / Posting Add
   All details which are appearing on homepage for buyer are mandatory for seller to add, but each post added should be deleted / expired automatically after 8 days if seller does not deletes it (but if seller marks it has been sold then add should be disappeared)

6- Next page is of chats
   Buyer can go to seller's post & start new chat with him & all chat history will be maintained of this chat (Selling & buying both chats should appear separately of every person's account)

7- Next page is of Adds (Active Adds & Pending Adds)

Wahid Associates (Rice World Project)

Active Adds / Pending Adds & rejected add Showing All Add Details, there posting date etc.
- Show who viewed the specific add that account details etc
